

Automate and accelerate provider enrollment with CredentialStream + Enroll

When it comes to provider enrollment, any delays, even seemingly short ones, can wind up costing organizations thousands of dollars per day and lead to dissatisfied providers. Enroll automates the provider enrollment process, enabling you to reduce the time it takes to enroll providers while also speeding up your revenue cycle.

Enroll Highlights

Simplified Provider Enrollment

Enrolling your providers with commercial insurance networks and government health programs is the first step towards achieving timely reimbursement. With [Enroll](#), you can:

- Proactively track and prioritize existing claims while also reducing delays and accelerating turnaround times for future claims
- Navigate provider enrollment using best practices and automated workflows that help to prevent held claims and denials
- Securely upload, store, and share your organization's enrollment documentation all in one centralized location

Who It's For

Anyone managing provider enrollment with payers contracted through their organization

Why You'll Love It

- Simplify provider enrollment & speed up your revenue cycle
- Reduce aging receivables & claim denials

Pre-Configured and Ready-to-Go Content

Monitoring the everchanging variables of enrollment can be complex and time-consuming. Enroll helps you achieve efficiency with:

- A library of nearly 7,000 pre-formatted payer enrollment forms, continuously updated to reflect changes in regulations and accessible in both .pdf and online formats
- The ability to pre-populate enrollment forms using standardized and validated data tables
- Exportable roster reports for delegated entities

Integrations to Get the Most From Your Data

A Provider and payer enrollment have many moving parts and involve quite a few different parties. With Enroll, you're supported by:

- Integrated online forms that support web enrollment processes, such as PECOS
- Validated data that can be quickly populated from trusted provider data sources, such as CAQH
- Our online Hub, which allows providers, chairs, chiefs, and stakeholders to communicate directly with your team, review documents, electronically sign forms, and more

CredentialStream + Enroll

CredentialStream includes everything you need to request, gather, and validate provider information and create a Source of Truth to serve downstream processes.

Enroll delivers a complete data management and workflow solution to automate the entire provider enrollment process.
